This versatile group of chairs designed by Charles Eames represents an innovation in upholstery technique: pads of Naugahyde and Saran are held in tension between frames of polished aluminum.

These lightweight chairs are versatile and rugged enough to serve handsomely indoors or outdoors, in the home, in the office, lobby or reception area.

Eames' fresh, original design approach has resulted in a group of chairs and tables at once elegant and moderately priced.

The lounge and reclining chairs pivot on bases of aluminum and are available with or without arms of black or polished aluminum. Upholstery covers include blue and grey Saran and the following Naugahydes: charcoal (202), raw umber (203), ultramarine blue (204), olive green dark (206), and tan dark (207).

Tables in the Eames Aluminum Group are available in dining and coffee table heights with tops of Botticino marble, honed slate, and opaque white glass. Bases are finished in black and polished aluminum.
