DCM

America's most famous modern chair, executed in molded plywood in dining or desk height. Also available in lounge height. Seats and backs in walnut, birch, ash, black or red. Legs in bright plated or black steel rod. Rubber shock mounts permit a slight flex to conform with changes in position.

Molded plastic shell with tailored one-piece upholstered foam rubber pad. Wire strut base has self-leveling floor glides. Upholstered in textured fabric or elastic Naugahyde in many colors. Pad snaps off for cleaning or replacement.

DAR-1

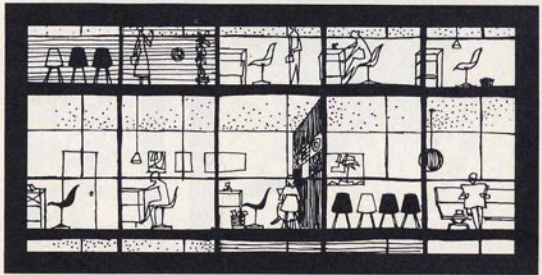

PKC-1

Welded wire shell, one-piece foam rubber pad on pivot base. Also available on strut, and steel rod bases.

Wire shell, removable 2-piece pad. In a variety of bases and heights for dining, desk, lounging.

MKX-2

LAR

Plastic shell reinforced with glass fibers, in a variety of colors on low, low strut base for lounging. Also available on a variety of bases in dining, desk and lounge heights. Cleans with a damp cloth.

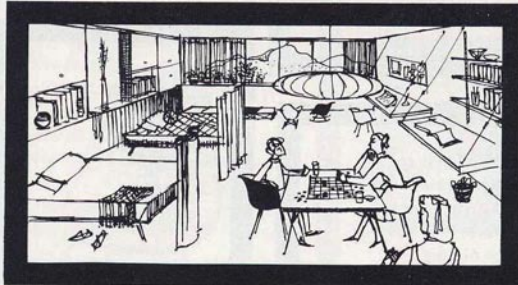

DAX

Ideal rocker for living room, game room, children's room. Glass fiber reinforced plastic shell in bright or neutral colors. Chair contours are designed for great comfort, durability. Cleans with a damp cloth. Base of bright plated or black wire and birch rockers.

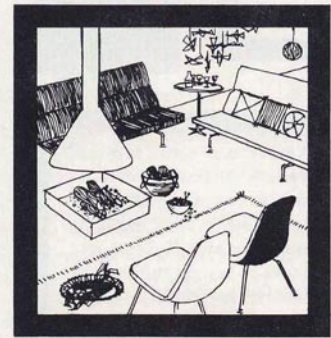

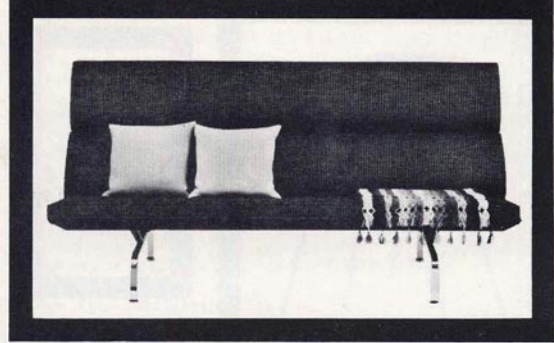

Eames molded plastic shell reinforced with glass fibers, on black tube or bright plated steel legs with stainless steel tipped glides. Also available in dining or desk height with a choice of four bases including a swivel-tilt; and in lounge heights, rocker or low-low base. Wide color selection. Cleans with a damp cloth.

RAR

DSR

473

Side chair of plastic reinforced with glass fibers. Comes in dining, desk or lounge height on tube, strut or pivot bases. Self-leveling floor glides. Exceptionally light weight, easily cleaned, and durable. Wide color choice.

Sofa designed by Charles Eames has all the attributes which characterize his chairs: comfort, durability, light-weight. High back supports the head. Easily cleaned and moved. Upholstered in foam rubber, covered in tweed or Naugahyde.
